

The METI Family: PARTNERS in MEDICAL EDUCATION

STAN

Discover a new and ever-improving version of Stan's HPS® and ECS™ models that now have even more realistic physiological features—all powered by the most advanced METI software.

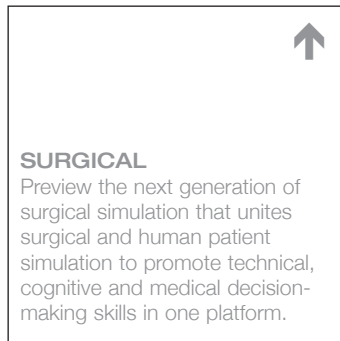

SURGICAL

Preview the next generation of surgical simulation that unites surgical and human patient simulation to promote technical, cognitive and medical decision-making skills in one platform.

LEARNING™

A diverse line of learning packages designed to empower educators, help you maximize simulator time and expose learners to specific simulations that will greatly impact their skills acquisition.

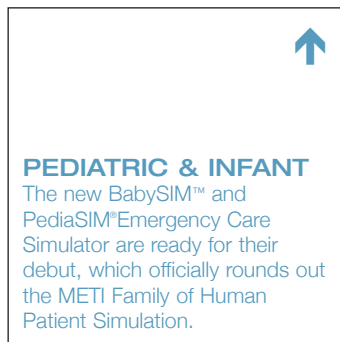

ExamSIM™

The Pelvic ExamSIM is the first in a line of new high-fidelity task-trainers that will dramatically change how learners gain knowledge in the area of pelvic, breast and prostate examinations.

METI LIVE Learning In a Virtual Environment

The first simulation-based learning system that provides the opportunity to practice, prepare and analyze every aspect of the chain of patient care and safety. LIVE is based on a \$20 million program developed by METI and the US Military, now ready for civilian use.

PEDIATRIC & INFANT

The new BabySIM™ and PediaSIM®Emergency Care Simulator are ready for their debut, which officially rounds out the METI Family of Human Patient Simulation.

F E B R U A R Y 2 2 - 2 5 , 2 0 0 5

Now more than ever, simulation is empowering medical education leaders with the ability to prepare learners with the most advanced professional skills—before they enter the workforce. Integrated simulation technologies now encompass nearly every human form, from infant to adult, and incorporate learning tools and technologies for nearly every possible medical emergency at every point of the medical delivery system. This year, simulation will fully evolve from individual scenarios to entire events and learners from all medical disciplines will be challenged to step outside of the boundaries of individual professional training and perform as partners in saving lives. This is the closest to real life that simulation has ever been.

Register online for this **FREE** conference. Visit our website at www.meti.com and look for the HPSN 05 link. See you at the luxurious Marriott Waterside Hotel, Tampa! (For hotel reservations, call 1-800-228-9290.)
